Personal Info

Name: Guneet Magar

Email: upadhriti94@example.org

Phone: +919766803094

College: MIT World Peace University (MIT-WPU)

Career Objective

To leverage strong frontend and backend development skills to contribute to innovative software solutions within a challenging and collaborative environment. Seeking an entry-level position where I can rapidly learn and grow my expertise.

Skills

- * JavaScript (including frameworks like React, Angular, or Vue.js)
- * Database Management (SQL and NoSQL databases)
- * API Design and Integration (RESTful APIs)
- * Version Control (Git)
- * Cloud Computing (AWS, Azure, or Google Cloud)

Achievements

1. Full-Stack Development Prodigy: Successfully designed, developed, and deployed a complex web application integrating advanced frontend frameworks (React/Angular/Vue.js) with a robust backend utilizing Node.js/Python/Java and a relational/NoSQL database, demonstrating mastery of full-stack development principles and exceeding project requirements.

2. Innovative UI/UX and API Integration Expert: Created a user-friendly and visually appealing web application with an intuitive user interface, while seamlessly integrating multiple third-party APIs into a sophisticated backend system. This project showcased exceptional skills in both frontend design and

backend API interaction, resulting in a highly functional and engaging user experience.
