

Jackson Sibal

Personal Info

Name: Jackson Sibal

Email: anjalirajagopalan@example.com

Phone: 06292342920

College: Vishwakarma Institute of Information Technology (VIIT)

Career Objective

To obtain an entry-level software developer position leveraging my proficiency in programming, database management, and software development methodologies. Seeking a challenging role where I can contribute to innovative projects and expand my technical skills.

Skills

- * Proficiency in at least one programming language (e.g., Python, Java, C++)
- * Database management (SQL, NoSQL)
- * Software development methodologies (Agile, Waterfall)
- * Data structures and algorithms
- * Version control (Git)

Achievements

1. Developed a novel, scalable algorithm for [specific task related to project, e.g., real-time object detection in low-light conditions] resulting in a [quantifiable improvement, e.g., 30%] increase in processing speed compared to existing state-of-the-art methods. This was implemented as part of the [Project Name] project, demonstrated through [evidence, e.g., a published paper, a successful demo at a university showcase].

2. Designed and implemented a fully functional [type of application, e.g., mobile application] for [purpose of application, e.g., assisting visually impaired individuals with navigation] using [specific technologies, e.g., React

Native and GPS APIs]. This project, [Project Name], successfully addressed the challenge of [specific challenge, e.g., providing accurate and timely route guidance in complex urban environments] and received [recognition, e.g., positive feedback from user testing and a high grade].
