

# Ranveer Ghosh

## Career Objective

To leverage frontend, backend, and AI/ML skills to contribute to innovative software development and contribute to a challenging and rewarding role. Seeking an entry-level position where I can utilize my technical abilities and grow professionally.

## Personal Info

Name: Ranveer Ghosh

Email: pooja09@example.net

Phone: 3245010931

College: Army Institute of Technology (AIT)

## Achievements

1. Developed a fully functional e-commerce platform integrating a personalized product recommendation engine using collaborative filtering (AI/ML backend) and a responsive, user-friendly frontend interface built with React. Successfully deployed the platform to a cloud server, demonstrating proficiency in full-stack development and AI implementation.
2. Created an innovative image recognition application utilizing a custom-trained convolutional neural network (AI/ML backend) capable of identifying and classifying objects with high accuracy. The application features a visually appealing frontend designed with Vue.js, and a robust REST API built with Node.js for efficient data handling and management.

## Skills

- \* Proficient in JavaScript frameworks (React, Angular, Vue.js)
- \* Expertise in Python for backend development and AI/ML
- \* Database management skills (SQL, NoSQL)
- \* Machine learning model development and deployment (TensorFlow, PyTorch)
- \* Cloud computing platforms (AWS, Google Cloud, Azure)
