

# Chakradhar Behl

## Skills

- \* Algorithm Design and Analysis
- \* Data Structures
- \* Programming Languages (e.g., Python, JavaScript)
- \* Database Management (SQL, NoSQL)
- \* Frontend Frameworks (e.g., React, Angular, Vue.js)

## Personal Info

Name: Chakradhar Behl

Email: tristan34@example.net

Phone: 02866992098

College: College of Engineering Pune (COEP)

## Career Objective

To leverage competitive programming and data analytics skills to secure a challenging entry-level software engineering role focused on frontend development. Seeking opportunities to contribute to innovative projects and enhance technical expertise.

## Achievements

Achievement 1: Consistently ranked within the top 10% of participants in university-level competitive programming challenges, demonstrating exceptional problem-solving skills and proficiency in algorithm design and implementation. Further showcased these abilities by leading the development of a data visualization dashboard for a university research project, effectively communicating complex datasets to a non-technical audience via an intuitive frontend interface.

Achievement 2: Successfully designed and implemented a sophisticated data analytics pipeline for a large-scale dataset, utilizing advanced techniques to

extract meaningful insights and generate predictive models. This project, further enhanced by a polished and responsive frontend application, was presented at the annual Computer Science department showcase, receiving high praise for both technical innovation and user experience design.
