

Aarav Singh

Skills

- * Solidity programming
- * JavaScript frameworks (React, Vue, Angular)
- * Smart contract development
- * Decentralized application (dApp) architecture
- * Web3.js or similar library usage

Personal Info

Name: Aarav Singh

Email: hnagy@example.org

Phone: 6460606307

College: College of Engineering Pune (COEP)

Career Objective

Seeking a challenging entry-level role leveraging web3 and frontend development skills to contribute to innovative projects. Eager to learn and grow within a dynamic technology company.

Achievements

Developed a decentralized social media platform using IPFS and Solidity, showcasing proficiency in frontend development with React and a deep understanding of blockchain architecture. The platform successfully integrated user authentication via Metamask and featured a fully functional NFT marketplace.

Built a dynamic NFT minting dApp with a user-friendly interface, leveraging React for the frontend and a custom smart contract deployed on a Polygon testnet. The project demonstrated expertise in integrating third-party web3 libraries and handling transactions efficiently, while also incorporating robust error handling and user feedback mechanisms.
