

Unnati Kapur

Skills

- * Proficiency in at least one programming language (e.g., Python, Java, C++)
- * Understanding of data structures and algorithms
- * Experience with databases (SQL, NoSQL)
- * Familiarity with version control systems (e.g., Git)
- * Software development methodologies (e.g., Agile)

Personal Info

Name: Unnati Kapur

Email: nicholas88@example.com

Phone: 04030623689

College: Symbiosis Institute of Technology (SIT)

Career Objective

To secure an entry-level software developer position leveraging my proficiency in Python and SQL, and understanding of data structures and Agile methodologies. To contribute to a dynamic team and rapidly expand my software engineering skills.

Achievements

1. Developed a novel, scalable, and efficient algorithm for [Specific task related to project, e.g., real-time object detection in low-light conditions] resulting in a [Quantifiable improvement, e.g., 30% reduction in processing time] compared to existing state-of-the-art solutions. The algorithm was implemented in [Programming Language] and deployed on a [Platform, e.g., Raspberry Pi cluster].
2. Designed and implemented a user-friendly [Type of application, e.g., mobile application] for [Purpose of application, e.g., managing student mental health resources] that integrates with [Specific technologies, e.g., a cloud-based database and a third-party API]. The application achieved [Quantifiable result, e.g., a 90% user satisfaction rating based on user feedback surveys] and demonstrated a strong understanding of software engineering principles including [Specific principles, e.g., agile development methodologies and test-driven development].
