Aachal Kohli

Career Objective

To leverage database, web3, and frontend skills in a challenging software development role, contributing to innovative projects. Seeking a position utilizing competitive programming strengths to build efficient and scalable solutions.

Personal Info

Name: Aachal Kohli

Email: avniraman@example.net

Phone: +913858795436

College: Vishwakarma Institute of Information Technology (VIIT)

Achievements

Achievement 1: Developed a decentralized, user-friendly NFT marketplace utilizing Solidity, React, and a PostgreSQL database, showcasing proficiency in Web3 development, competitive programming optimization for transaction speed, and robust frontend design.

Achievement 2: Built a high-performance, scalable data analytics platform for visualizing and querying large datasets, incorporating advanced SQL techniques, optimized algorithms for competitive programming challenges encountered during data processing, and an intuitive user interface using a modern JavaScript framework.

Skills

* SQL and NoSQL database management
* Algorithm design and competitive programming proficiency (e.g., in C++ or Python)
* Smart contract development (Solidity) and Web3 technologies

* JavaScript frameworks (React, Angular, or Vue.js) for frontend development

* RESTful API design and integration
