Lakshit Verma

Achievements

Achievement 1: Developed a decentralized, user-friendly NFT marketplace utilizing Solidity, React, and a PostgreSQL database, showcasing proficiency in full-stack development and Web3 technologies while maintaining robust data management.

Achievement 2: Designed and implemented a secure, scalable web application for managing student records leveraging a NoSQL database, integrating a user-friendly frontend built with Vue.js, and employing advanced cryptographic techniques to ensure data integrity and privacy within a blockchain-based system.

Skills

* SQL Database Management

* Smart Contract Development (Solidity, etc.)

* JavaScript Frameworks (React, Angular, Vue.js)

* Web3.js or similar Web3.0 JavaScript library

* RESTful API Integration

Personal Info

Name: Lakshit Verma

Email: vidhimody@example.net

Phone: +911449439197

College: Dr. D.Y. Patil Institute of Technology

Career Objective

To leverage database, Web3, and frontend skills to contribute to innovative software development within a challenging and rewarding environment. Seeking an entry-level position where I can apply my technical expertise and grow professionally.
