Ekbal Bawa

Career Objective

To secure an entry-level software development role leveraging my skills in object-oriented programming, databases, and agile methodologies. Seeking a challenging position where I can contribute to innovative software solutions and further develop my expertise.

Personal Info

Name: Ekbal Bawa

Email: yashodhara26@example.com

Phone: 00114340662

College: College of Engineering Pune (COEP)

Achievements

1. Developed a novel algorithm for [specific task related to project, e.g., real-time object detection in low-light conditions] resulting in a [quantifiable improvement, e.g., 20%] increase in accuracy compared to existing state-of-the-art methods. This was demonstrated through rigorous testing and evaluation in the [project name] project.

2. Successfully designed and implemented a [type of system, e.g., distributed, cloud-based] application for [purpose of application, e.g., managing patient medical records] using [technologies used, e.g., Java, Spring Boot, and PostgreSQL]. The project, [project name], fulfilled all specified requirements and demonstrated scalability and robustness through [method of demonstration, e.g., successful load testing under simulated peak usage].

Skills

* Proficiency in at least one object-oriented programming language (e.g., Java, Python, C++)

* Database management and SQL

* Data structures and algorithms

* Software development lifecycle methodologies (e.g., Agile)

* Version control systems (e.g., Git)
