Joshua Karan

Skills

* Proficiency in at least one programming language (e.g., Python, Java, C++)

* Database management and SQL

* Data structures and algorithms

* Software development methodologies (e.g., Agile)

* Version control (e.g., Git)

Personal Info

Name: Joshua Karan

Email: bahlnetra@example.org

Phone: +913650010668

College: Pimpri Chinchwad College of Engineering & Research (PCCOER)

Career Objective

To obtain an entry-level software development role leveraging my skills in Python, SQL, data structures, Agile methodologies, and Git to contribute to innovative projects. Seeking a challenging position where I can apply my technical abilities and continue to learn and grow.

Achievements

1. Developed a novel, high-performance algorithm for [specific task, e.g., real-time object detection in low-light conditions] resulting in a [quantifiable improvement, e.g., 30% reduction in processing time] compared to existing state-of-the-art solutions. This was implemented as part of the senior capstone project, "[Project Name]", and validated through rigorous testing and benchmark comparisons.

2. Designed and implemented a fully functional [type of application, e.g., mobile application, web service] for [purpose, e.g., managing student organization finances, providing accessible educational resources] leveraging [specific technologies, e.g., React Native, AWS Lambda]. This project, "[Project Name]", demonstrated proficiency in full-stack development, including database design, API integration, and user interface design, and received positive feedback from [mention source of feedback, e.g., client, professor, user testing].
