Widisha Ahuja

Achievements

Developed a novel AI-powered recommendation system for an e-commerce platform, leveraging backend infrastructure to handle large datasets and deploying a scalable, high-performance solution resulting in a 15% increase in sales conversion.

Built a robust data pipeline for a city-wide traffic prediction model, integrating various data sources, applying advanced machine learning techniques, and creating a user-friendly visualization dashboard, leading to improved traffic management strategies and reduced congestion.

Skills

* Proficiency in Python (including relevant libraries like NumPy, Pandas, Scikit-learn)
* Experience with SQL and NoSQL databases
* REST API design and development
* Cloud computing platforms (e.g., AWS, Google Cloud, Azure)
* Machine learning model deployment and monitoring

Personal Info

Name: Widisha Ahuja

Email: bobalutkarsh@example.com

Phone: 4336819367

College: MIT World Peace University (MIT-WPU)

Career Objective

To leverage backend, AI/ML, and data science skills in a challenging role contributing to innovative software solutions. Seeking an entry-level position offering opportunities for professional growth and impactful contributions.
