Anika Vohra

Career Objective

To secure an entry-level software developer role leveraging my skills in programming, database management, and SDLC methodologies to contribute to innovative projects. Seeking a challenging position where I can apply my knowledge of data structures and algorithms and further develop my technical expertise.

Personal Info

Name: Anika Vohra

Email: harrisonbora@example.com

Phone: 7099738458

College: Pune Institute of Computer Technology (PICT)

Achievements

1. Developed a novel, scalable, and efficient algorithm for [specific task, e.g., real-time object detection in low-light conditions] resulting in a [quantifiable improvement, e.g., 30% reduction in processing time and a 15% increase in accuracy] compared to existing state-of-the-art methods. This was implemented as part of a senior capstone project focusing on [project area, e.g., autonomous vehicle navigation].

2. Designed and implemented a fully functional [type of application, e.g., mobile application] for [target audience/purpose, e.g., managing personal finances for college students] utilizing [specific technologies, e.g., React Native, Firebase] which demonstrated proficiency in both front-end and back-end development. The application achieved [quantifiable result, e.g., over 500 downloads within the first month of launch on a test deployment].

Skills

* Proficiency in at least one programming language (e.g., Python, Java, C++)

* Database management (SQL, NoSQL)

* Software development lifecycle (SDLC) methodologies (Agile, Waterfall)

* Version control systems (Git)

* Data structures and algorithms
